

The Road to the Future

September 18-23, 2023
Hall 12
Booth B30

A close-up photograph of a precision machining process. A sharp, multi-fluted metal tool bit is positioned above a rotating workpiece, which appears to be a die or mould component. The workpiece has a complex, multi-lobed internal profile. The background is a light blue and white dotted pattern.

Die&Mould

A close-up photograph of a complex mechanical component, likely a part of a transportation system. The component is made of dark metal and features various bolts, flanges, and a central shaft. The background is a plain, light grey color.

Transportation

Dear business partner,

We cordially invite you to visit Makino's booth during **EMO 2023 in Hannover.**

Makino will showcase more than 15 machining centres, including several European premieres.

See for the very first time Makino's new solution for automating the high-end wire EDM market, UPX400. And don't miss the opportunity to see the first vertical mill-turn 5 axis machining centre from Makino, the Slim3n MT. This machine brings flexibility and the best performance to the most demanding job shop operators.

Please register:

bit.ly/3Ns9uBT

As machine tool maker, Makino has a strong commitment to the environment and our business partners. That is why we always strive to find the most sustainable production methods.

Manufacturers will be able to see our new automation solutions: the uCell B80, an innovative solution for the die and mould market, and the high-performance DA300 automation package, our most dynamic 5-axis vertical machining centre with an extensive level of autonomy provided by 40 work-holding pallets.

Come and see how the performance of our machines and our automation solutions can reduce your production costs. We look forward to meeting you at our booth in Hannover on **September 18 - 23, 2023 – Hall 12, Booth B30.**

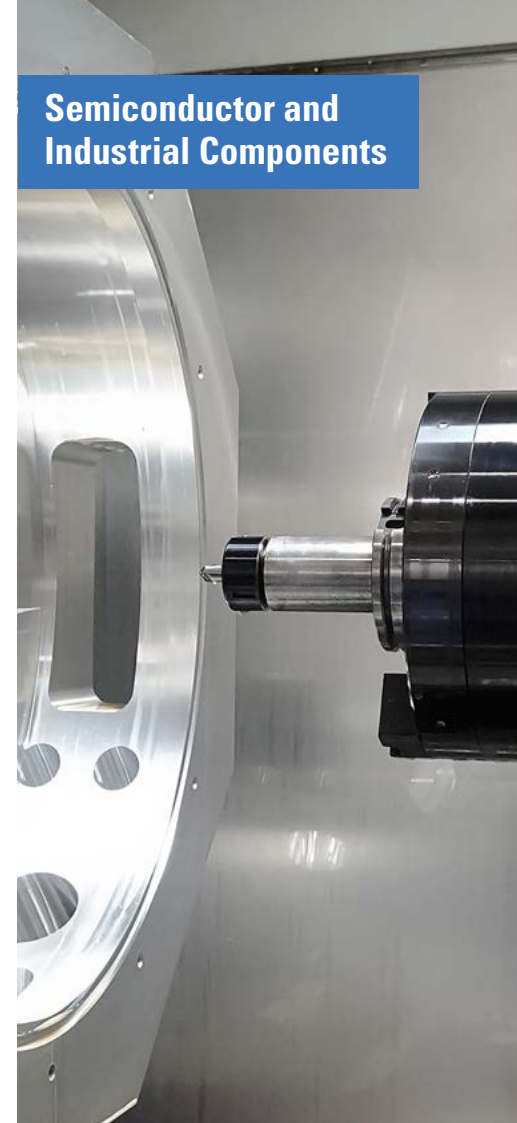

Urko Javier Ugalde
